

TABLE OF CONTENTS

LIST OF TABLES	v
LIST OF FIGURES.....	vi
ABSTRACT.....	viii
CHAPTER 1. INTRODUCTION	1
1.1.Introduction to watershed modeling with WEPP and GIS	1
1.2.Objectives	4
1.3.Organization.....	4
1.4.Definition of terms	5
CHAPTER 2. LITERATURE REVIEW.....	7
2.1.Erosion research and models.....	7
2.1.1.The USLE model	8
2.1.2.The RUSLE model.....	10
2.1.3.The WEPP model.....	13
2.1.4.Slope gradient and slope length in the WEPP model.....	14
2.1.5.WEPP slope gradients and slope length inputs.....	22
2.1.6.WEPP slope length and gradient sensitivity.....	22
2.1.7.The WEPP watershed model	23
2.1.8.Erosion models summary	26
2.2.Defining hillslopes.....	29
2.2.1.Irregular topography in erosion modeling.....	32
2.3.Watershed modeling with DEMs	36
2.3.1.Flow routing algorithms	38
2.3.2.Removal of depressions and flow routing through flat areas	40
2.3.3.Channel initiation.....	41
2.3.4.Watershed models using GIS.....	46
2.4.Literature review summary	47
CHAPTER 3. WATERSHEDS AND METHODS.....	48
3.1.Research watersheds.....	49
3.1.1.Treynor W2 watershed	49
3.1.2.Holly Springs WC1, WC2, and WC3 watersheds	52
3.1.3.Watkinsville P1 and P2 watersheds	53

3.1.4.DEM creation of Holly Springs and Watkinsville watersheds	57
3.2.Methods developed.....	58
3.2.1.Hillslope method.....	61
3.2.2.Flowpath method.....	74
CHAPTER 4. APPLICATION TO WATERSHEDS	79
4.1.Analyses.....	79
4.2.Results and discussion	86
4.2.1.Runoff.....	86
4.2.2.Sediment yield	87
4.3.Conclusions.....	90
CHAPTER 5. RESOLUTION, METHODS, AND EVENT SIZES.....	92
5.1.Introduction.....	92
5.2.Experimental setup and hypotheses.....	93
5.2.1.Watersheds and measured data	93
5.2.2.Resolution and its effects on slope and flowpath length.....	94
5.2.3.Event size ranges.....	101
5.2.4.Methods of applying WEPP with DEMs: Chanleng, Calcleng, and Flowpath ..	102
5.2.5.Statistical analysis	104
5.3.Discussion of results.....	108
5.3.1.Hypothesis 1: Effects of DEM resolution	108
5.3.2.Hypothesis 2: Accuracy of prediction for different event sizes and interactions with resolution.....	120
5.3.4.Hypothesis 3: Definition of the hillslope length.....	126
5.4.Summary and Conclusions	127
CHAPTER 6. SUMMARY AND CONCLUSIONS	131
6.1.Summary of objectives	131
6.1.1.Objective 1. Development of methods.....	131
6.1.2.Objective 2. Application to research watersheds.....	132
6.1.3.Objective 3. Evaluation of performance of methods	133
6.2.Overall conclusions	134
CHAPTER 7. RECOMMENDATIONS FOR FURTHER RESEARCH	136
7.1.Watershed modeling with GIS and DEMs.....	136
7.2.The WEPP model and GIS	137
LIST OF REFERENCES.....	140
APPENDICES	150
APPENDIX A. Computer Programs for WEPP - GIS Interface.....	151
APPENDIX B. Statistical Programs and Data.....	170
VITA.....	180
