| Prologue | 111 | Major Climatic Determinants | 27 |
| <i>Prólogo</i> | iv | The Equatorial Trough | 27 |
| <i>Prólogo</i> | v | Polar Air Masses | 27 |
| Preface | xi | Rainfall Patterns | 27 |
| <i>Prefacio</i> | xii | Climatic Classifications | 27 |
| <i>Prefácio</i> | xiii | Koppen Classification | 27 |
| Acknowledgments. Agradecimientos. Agradecimentos | xv | Holdridge Life Zones | 32 |
| | | Thornthwaite Classification | 32 |
| Introduction: The Land-Systems Study | 1 | Land-Systems Approach to Climate | 32 |
| Objectives | 1 | Meteorological Data Collection and Compilation | 32 |
| Geographic Scope | 2 | Mean Temperature | 34 |
| Methodology | 2 | Mean Solar Radiation | 34 |
| Climate | 2 | Potential Evapotranspiration | 34 |
| Soil Moisture | 2 | Precipitation Deficit | 35 |
| Landscape | 2 | Dependable Precipitation | 35 |
| Soil Classification | 3 | Moisture Availability Index | 35 |
| Physical and Chemical Soil Properties | 3 | Moisture Availability Index and Soil Moisture | 37 |
| The Data Management System-Computerization | 3 | Meteorological Data Sets | 37 |
| Data Input | 3 | Climate and Physiognomic Vegetation Patterns | 37 |
| Climate File | 4 | Vegetation Classes | 37 |
| Land-system File | 5 | Discriminant Analyses of Meteorological Data | 37 |
| Land-facet File | 5 | Vegetation and Wet-Season | |
| Map File | 5 | Potential Evapotranspiration | 37 |
| Data Output | 5 | WSPE and Well-Drained Savannas | 38 |
| Use of the Study by Agronomists | 5 | Climatic Potential for Growth of Vegetation | 38 |
| Agrotechnological Development | 7 | Climatic Subregion | 38 |
| | | Soil-Moisture Stress and the <i>Veranicos</i> | 41 |
| Chapter 1. Land-System Mapping for Seed-Based | | A Fresh Approach to Climatic Zoning | 41 |
| Agrotechnology Transfer | 9 | | |
| A Historical Note | 9 | Photo Plates | 43 |
| Previous Knowledge of the Region | 9 | Amazon Basin | 43 |
| A Case Study: Using the Land Systems Map | | Brazilian Shield | 45 |
| Agroecosystems for Tropical Pastures | 10 | Andean Foothills | 47 |
| Isohyperthermic Savannas | 16 | Mojos Pampas | 48 |
| Isothermic Savannas | 16 | Orinoco Basin | 48 |
| Tropical Semi-Evergreen Seasonal Forest | 16 | Pantanal | 49 |
| Tropical Rain Forest | 16 | Parana Basin | 50 |
| Discussion | 16 | | |
| | | Chapter 4. Landscapes | 51 |
| Chapter 2. Description of the Land Systems Map | | Geology | 51 |
| And Landscape Facets | 19 | Hydrology | 51 |
| Satellite and Side-Looking Radar Imagery | 19 | Physiographic Regions | 52 |
| Land-System Delineation | 20 | Amazon Basin | 52 |
| Map Making | 21 | Brazilian Shield | 52 |
| Computerization and Thematic Maps | 21 | Elbow of the Andes | 52 |
| The Printed Land-Systems Map | 21 | Andean Foothills | 52 |
| Physiology | 21 | Guyana Shield | 52 |
| Climate | 22 | Mojos Pampas | 52 |
| Topography | 22 | Orinoco Basin | 52 |
| Vegetation | 22 | Pantanal | 52 |
| Soil --The Soil Classification Legend | 22 | Parana Basin | 52 |
| Synthesis | 25 | Physiographic Units | 52 |
| Chapter 3. Climate | 27 | Land Systems, Land Facets, and Mapping Scales | 53 |
| | | Topography | 54 |

|--|-------------|
| Chapter 9. Adapting Seed-Based Agrotechnology to | |
| Local Conditions: Some Guidelines | 115 |
| Transferring Technology Based on Land Systems | 115 |
| Enhancing Soil Fertility Information | 115 |
| Field Trials | 116 |
| Summary | 116 |
| Epilogue: Developing Land-Systems Maps for other Areas | 117 |
| Appendices | 119 |
| 1. Approximate Equivalence between Soil Taxonomy | |
| Groups, the FAO Soil Map Legend, | |
| And the Brazilian Soil Classification Systems | 119 |
| 2. Recent Methodology for Correcting Al Toxicity | 127 |
| An Improved Liming Equation | 127 |
| Testing the Equation | 128 |
| Soil Analysis for the Equation | 128 |
| | 128 |
| 3. A Statistical Procedure for Enhancing | |
| Soil Surveys for Soil Fertility Investigations | 129 |
| Recommendations from the Statistical Procedure | 129 |
| K Deficiency | 129 |
| Possible Mn, Zn, and B Deficiencies | 130 |
| Discussion | 137 |
| 4. Comparative Tissue Analysis for | |
| Speeding-up Field Trials | 137 |
| Selection of Treatments for Field Trials | 137 |
| Monitoring | 137 |
| Treating Tissue Analytical Data as Yield Data | 137 |
| Implementing the Results of Monitoring | 138 |
| Bibliography | 139 |
